Faisal Al Zaabi Chief Executive Officer

Javed Mustafa Chief Financial Officer

Amer Al Mashani Acting Chief Operating Officer

Dear Shareholders,

It is my greatest pleasure, on behalf of the Board of Directors, to report on the performance of your company, Dhofar Generating Company SAOG ('DGC' or 'Company'), at the end of another successful year.

Safety remains the core value of the company. The business has continued to maintain its safety track record of zero Lost Time Injury and zero environmental exceedances during the year. This excellent result has been achieved by involving all people including third party employees in the various safety initiatives implemented at the plant.

The operational performance of the plant continues to meet or exceed expectations by achieving an almost perfect commercial availability factor. The excellent operational performance has enabled the business to fulfil its financial obligations to the shareholders and timely debt service to the project lenders. The safe and reliable performance of the power plants has enabled the business to declare a cumulative dividend of OMR4 million paid out during 2019.

The directors convened all necessary meetings during the year, along with Audit Committee and Nomination and Remuneration Committee meetings, as required.

Strategic positioning

DGC is one of two independent power plants owners in the Dhofar region, with a 62% share in the southern power grid of the Sultanate of Oman. It owns and operates two power plants: a 273MW Open Cycle Gas Turbine ('OCGT') power plant ('Existing Plant') and a 445MW Combined Cycle Gas Turbine ('CCGT') Power Plant ('New Plant').

The Company has one customer, the Oman Power and Water Procurement Company ("OPWP"), and one supplier for the primary fuel (natural gas), the Ministry of Oil and Gas. The EPC Contractor for the New Plant is SEPCO III Electric Power Construction Corporation, a leading power construction contractor from China with extensive international and regional experience. Plant operations and maintenance for both plants have been contracted to Dhofar O&M Company LLC and further sub-contracted to the First National Company for Operation and Maintenance Services LLC ('NOMAC Oman') with an agreement that is co-terminus with the Power Purchase Agreement ('PPA').

Operational performance

NOMAC Oman has demonstrated operational excellence during the year by maintaining excellent reliability factors of 99.9% (2018: 99.6%) and 99.7% (2018: 99.7%) for both the OCGT and CCGT power plants respectively. The operator has undertaken several initiatives during the year to bring value to the business. These include the implementation of an interconnection between the 273MW and 445MW power plants to optimize import costs. Another key activity included the commissioning of the Monitoring Prediction Centre, an initiative which is expected to help sustain high plant availability with

optimized maintenance costs through early prediction of potential operational issues. One of the key focus areas during the year was on cybersecurity, which has become a critical security concern as technology matures.

The high reliability factor has helped bring stability to the Dhofar grid, which is a key objective of the business. The operator has operated the plant in a safe, reliable and prudent manner with adequate reporting disclosures to the satisfaction the Company despite the challenge of operating two plants on different technologies.

The DGC team alongwith the operator has worked throughout the year to raise relevant warranty notes to the EPC Contractor for the new plant and to ensure close out of both open warranty and punch list items.

Financial Performance

The strong operational performance has enable adequate financial performance of the Company during 2019 with a profit after tax of OMR 0.7m (2018: OMR 0.4m). Under its dividend distribution policy, the Company seeks to distribute the available cash flows as dividends to its shareholders, after meeting the debt service and other operational needs and subject to the applicable local regulations. The Company has met its obligations to the lenders by the timely debt service of RO. 13.6m during the year. The Company distributed dividends of OMR 4m (i.e. 9bz per share in both February and August 2019) to its shareholders during the year in line with its commitments.

We are pleased to report that all capacity revenues have been paid on the due date by the offtaker, however fuel revenue has not been paid by the offtaker since June 2019. While the fuel supplier has billed the Company on a monthly basis, it has not demanded payment as the business has not received any payment from the offtaker. It is worth mentioning that this payment status is common to the entire power sector. It is important to note that the business earnings are dependent on the capacity revenues and not the fuel revenue.

The Company believes in a strong control environment and accordingly endeavors to maintain best in class financial controls and reporting standards. Your Company continues to achieve these standards, and this is periodically confirmed by timely, accurate reporting as well as rigorous auditing processes and procedures. Your Company remains in compliance with the Code of Corporate Governance of the Capital Market Authority.

Our people

The year's results reflect the team effort and hard work by the entire business team including the Board, management and the operator supported by the founder shareholders.

The directors of your Company are a set of diverse individuals with vast financial, operational, technical and market-oriented experience. They have provided a robust and empowering framework to develop a positive work culture and ethic. The management of the company, under the guidance of the Board, have worked diligently and creatively to implement the vision of the Board and to bring excellence to the business. The directors and management of your Company have demonstrated their business acumen and strategy of looking after all stakeholders' interests and generating value for everyone through innovative solutions implemented throughout the year. The team, which includes both DGC and operator members, consists of strong individuals with varied experience and exposure who bring maturity to the business. Development of Omani talent remains a key consideration at the business.

I, alongwith the Board, would like to extend my gratitude to the entire team who have worked diligently throughout the year to deliver business commitments.

Social Responsibility

The Board has developed a Corporate Social Responsibility ('CSR') policy to help guide us be a better and more effective corporate citizen while recognizing the scale of our footprint. By its very nature, the Company is a responsible corporate citizen as it focuses in providing clean and reliable power. The scope of the policy includes:

Practical financial assistance, sponsored programs, free products and services to a wide range of educational, charitable, cultural, health, community and environment causes in Oman, and

Community support through sponsorship of worthy initiatives in the field of education.

In line with the vision developed in the CSR policy and within the approved budget by shareholders, the Company has invested 15000 OMR in three initiatives projects during 2019 in the Dhofar region as following:

#	Beneficiary	Amount (OMR)	Description
1	Ministry of Health Sultan Qaboos Hospital, Cardiac Centre	4,500	Help procure an Ergometer used in stress echocardiography. This device is installed in Sultan Qaboos Hospital, Cardiac Centre in Salalah.
2	Ministry of Social Development – Center for rehabilitation of the disabled	3,500	Help equip room for children with special needs with specialized equipment. Special equipment in hearing, sight and touch in Centre for rehabilitation of the disabled students which accommodates 200 students with special needs in Salalah.
3	Director General of Education - Dhofar Governate	7,000	Implementation of digital learning in a school. This includes installation of projectors and TVs in each class including a smart board the laboratory for a school which includes primary and secondary sections i.e. year 1 to 12.
	Total	15,000	

As part of a training initiative for local talent, the Company provided two months training for 10 local fresh engineers from the universities and hosted 50 students from Salalah College of Technology for a two days visit.

Medium term outlook

The business has taken reasonable steps to ensure high reliability in the coming year through a required maintenance program and improvement initiatives. High availability will ensure the financial performance of the Company as returns are not dependent on demand. Under the concept of continuous improvement, the business will continue to focus on the reliability of supply, efficient operations and cybersecurity as a key concern. We look forward to the resolution of the fuel payments by the authorities in 2020.

The business will focus on a successful defect warranty liability close out in 2020. Our foremost commitment remains to provide safe, clean and reliable power to the people of the Sultanate of Oman.

Acknowledgements

We appreciate the support of all our key stakeholders especially our customer (the Oman Power and Water Procurement Company), our fuel supplier (Ministry of Oil and Gas), the Authority of Electricity Regulation and the Ministry of Commerce and Industry.

Finally, on behalf of the Board of Directors, I would like to take the opportunity to express our gratitude to His Majesty Sultan Haitham bin Tarik and His Government for their vision, guidance, wisdom and continued support. We would also like to acknowledge the progressive and enlightened vision of His Majesty Sultan Qaboos bin Said which continues to be a model for others to emulate and without it, the success being achieved by many would not have been possible.

Rohit Gokhale Chairman

Said Safrar

Faisal Al Zaabi Member of the Board Cheif Executive Officer

Main objects and business

The principal activities of Dhofar Generating Company SAOG (the 'Company' or 'DGC') are to develop, finance, design, construct, operate, maintain, insure and own a net 718 MW power generating station and other relevant infrastructure. The Company comprises of an 273MW Open Cycle Gas Turbine ('OCGT') Power Plant ('Original Plant') with commercial operations in May 2003 and a 445MW Combined Cycle Gas Turbine ('CCGT') Power Plant ('New Plant') with commercial operation date ('COD') on 1 January 2018. The Company is located at Raysut, Salalah and has no subsidiaries as of 31 December 2019.

The Company's business is regulated by project agreements with various government entities and financing agreements with project lenders. These project agreements provide an assurance both over revenue and cost elements of the business.

The principal agreement is the 15 year Power Purchase Agreement ('PPA') with the Oman Power and Water Procurement Company ('OPWP') which requires the Company to make the power facilities available and deliver electrical energy as per contractual terms. The PPA expires on 1 January 2033 i.e. 15 years from the COD of the New Plant. The Company has a fuel supply agreement with the Ministry of Oil and Gas, the term being co-terminus with the PPA term.

The Company has been granted a Generation License by the Authority of Electricity Regulation for a period of 25 years effective 1 January 2014. This license was modified by the Authority on 26 January 2017 to include the additional power capacity available through the New Plant.

The Company has contracted out the operation and maintenance activities to Dhofar O&M Company LLC ('Dhofar O&M' or 'Operator') effective from 4 June 2015. The term of the O&M Agreement is co-terminus with the term of the PPA. Dhofar O&M is an Omani company wholly owned by ACWA Power, Mitsui & Co., Ltd and DIDIC. The Operator has sub-contracted the entire scope of the O&M Agreement to First National Company For Operation & Maintenance Services LLC ('NOMAC Oman'). NOMAC Oman is a subsidiary of First National Operation and Maintenance Company ('NOMAC') which is a wholly owned subsidiary of ACWA Power. The term of the sub-contract O&M agreement is co-terminus with the O&M Agreement.

Risks faced by the company

The main risks faced by the Company include loss of availability due to breakdowns, accidental damage and default in payment by the off-taker. The Company has been able to transfer its operations and maintenance risk as per the O&M Agreement to its Operator after implementing the agreement in 2015.

The Operator has maintained almost perfect reliability since taking over the operations and maintenance function of the plant by implementing robust predictive, proactive and preventive procedures which are well aligned with best international power sector practices.

Financial obligations of the OPWP are secured under the PPA. Additionally, adequate insurance policies are in place to protect the business against property damage, business interruption, public liability and sabotage and terrorism risks. The PPA protects the Company against inflation and the Rial Omani/US Dollar exchange rate movement, if any. Fuel cost is predetermined in the fuel supply agreement over the period of the PPA. As per the terms of the PPA, reliability of the power plant is the key element relating to the profitability of the Company. The load factor has a limited impact on the profits mainly to the extent of any heat rate loss.

Under the NGSA, the Company is required to make payments for natural gas procured within 30 days of receipt of invoice, irrespective of the Company receiving the fuel revenue payments from OPWP. In the event that OPWP delays or fails to make the fuel revenue payments, the Company is still required to make payments under the NGSA. In order to mitigate any such delay or payment shortfall of OPWP, the Company has maintained a Fuel Reserve Account ('FRA') of US\$ 8.1 million through a combination of corporate guarantees, letters of credit and cash deposit. In the event there is a delay or reduction of the fuel revenue payments due from OPWP, the Company may draw upon the FRA to meet its payment obligations for natural gas under the NGSA.

Interest on the Dollar portion of the long-term loan, which reflects 58% of the total outstanding loan, is hedged through interest rate swap agreements. With respect to its Omani Riyal denominated loans, the interest rate has been fixed for a period of five years from the date of the CTA, i.e. until 8th July 2020. Under the OMR Commercial Facility Agreement, the Company and the lenders have put in place a mechanism that allows for the interest rate post this period to be reset for a further period of five years, subject to a cap of 6.50%. Under this mechanism, any increase in interest expense is structured to result in principal repayments to be contractually deferred to after the loan term such that the amount of debt service paid to the Omani lenders will remain the same. Such deferred principal repayments, called Term Out Repayment will be payable in six equal instalments, three years after the end of the PPA term. Any decrease in interest expense is structured to result in increased principal repayments to repay any such Term Out Repayments (if any) such that the amount of debt service paid to the Omani lenders will remain the same. Hence, there may be an impact in the income statement due to the reset of the interest rate of the Omani Riyal denominated loans on recognition of interest, but there will be no impact to the cash flows available for the shareholders during the PPA term.

The long-term agreements noted above with best in class service providers and government entities provide a high degree of confidence in continuity of operations with minimal disruptions. The management will continue to actively perform risk analyses to identify and mitigate potential challenges.

Operational & Organizational Highlights

Operational performance during 2019 has been remarkable. Commercial availability factor for Original and New Plant was 99.9% and 99.7% respectively. The extremely low forced outage factor is indeed a notable result.

The success and reputation of the business is dependent on operational results. NOMAC Oman has played an integral role in achieving these top decile results. The performance reflects NOMAC Oman's worth as an operations and maintenance expert.

NOMAC Oman is a mature and diverse organization with a blend of a highly specialized and talented human resources. Each member of the senior management has significant experience in the power and related sectors. The team has demonstrated their expertise on both OCGT and CCGT technologies.

Key initiatives taken by the team include the implementation of an interconnection between the 273MW and 445MW power plants to reduce import costs. Another key activity included the commissioning of the Monitoring Prediction Centre, an initiative which has helped sustain high plant availability with optimized maintenance costs through early prediction of potential operational issues.

A key consideration for all power plants is cybersecurity and this element is also being actively monitored by the AER. During the year, the Company with the help of its founding shareholders implemented a cybersecurity program which included implementation of controls, installation of necessary hardware and monitoring software followed up by required internal and external reviews. The AER also concluded a cybersecurity audit of the Company and their observations are being implemented.

Power Generation

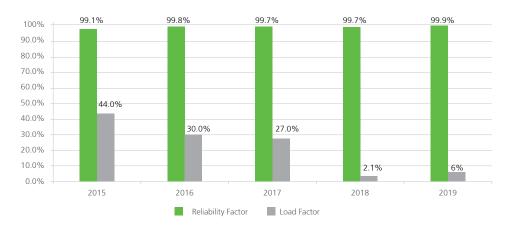

273MW Original Plant

The Original Plant delivered an outstanding power reliability factor in 2019 of 99.9%, which is consistent with prior years. The plant exported 136 GWh during 2019 (2018: 49 GWh). The load factor, which is 5.7% for 2019 (2018: 2%), is dependent on the demand for power by the national grid.

The following table reflects the reliability factor, load factor and energy export trend for the last five years.

Year	Energy Exported (GWH)	Load Factor	Reliability Factor
2019	136	5.7%	99.9%
2018	49	2%	99.7%
2017	653	27%	99.7%
2016	1,465	30%	99.8%
2015	1,066	44%	99.1%

A graphical comparison of reliability factor vs load factor for the last five years is shown below.

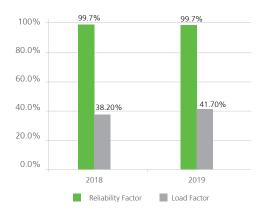

445MW New Plant

The New Plant has performed sustained its performance with an almost perfect reliability factor of 99.7%. The plant exported 1,489 GWh during 2019 (2018: 1,625 GWh). The load factor, which is 38.2% for 2019 (2018: 41.7%), is dependent on the demand for power by the national grid.

The following table reflects the reliability factor, load factor and energy export trend for the last five years.

Year	Energy Exported (GWH)	Load Factor	Reliability Factor
2019	1,489	38.2%	99.7%
2018	1,625	41.7%	99.7%

A graphical comparison of reliability factor vs load factor for the last two years is shown below.

Plant Maintenance Philosophy

The 273MW Plant consists of eight 6B.03 open-cycle gas turbines (GT), i.e. six General Electric PG6581 B gas turbines, one General Electric LM2500 aero-derivative gas turbine and one General Electric PG6561 B gas turbine. GTs 1 to 6 were commissioned in May 2003. Subsequently, GTs 7 and 8, which were in operation by the Ministry of Electricity & Water since 1995 and 1998 respectively, were taken over by the company and integrated with GTs 1 to 6 in 2007.

The 445MW Plant consists of two blocks with a net capacity of 222.65MW per block. Each block includes two GE 6FA.03 gas turbines, two triple pressure HRSGs and one steam turbine from Skoda.

The Company, alongwith the Operator and NOMAC Oman, has developed a robust strategy to ensure that the machines remain in pristine condition with the ability to provide sustained results. The cornerstones of NOMAC Oman operations and maintenance philosophy include safety, people and performance and have implemented an ERP, ERM and a well established supply chain management process. This approach has been integral in achieving the operational results during 2019.

Maintenance has been performed on all machines in line with Original Equipment Manufacturer ('OEM') recommendations. NOMAC Oman has entered into a long term services agreement for the maintenance services to the gas turbines of the New Plant with General Electric International (GE). The term of this agreement is sized to continue till the maturity of the PPA. This ensures that the Company has adequate access to the spare parts, technological upgrades so as to minimize risk of unplanned outages, with long term price risk largely passed on to GE.

The power plant is required to be 100% available in the summer months due to peak summer demand while in winter period there is an outage allowance of 15% to cater to planned maintenance. All planned outages were performed in the winter period without effecting the revenue stream. The planned outages were in line with recommendations of the OEM. NOMAC Oman performed routine preventive and predictive maintenance activities along with corrective maintenance to ensure sustained healthiness and reliability of all machines and equipment.

There was no planned major maintenance during 2019.

Health, Safety and Environment

Occupational health, safety and environment is the highest priority for the business and its people.

The team is very proud of its zero LTI safety record since acquisition. Sub-contractors are expected to conform to the organization's safety standards and they are trained in this respect by the team. DGC and NOMAC celebrated their annual Occupational Health, Safety and Environment Day on 17 June 2019. The Company has reached 1.4 Million LTI Free Man hours at the end of December 2019.

NOMAC Oman continues to maintain the OSHAS 18001:2007 certification for Occupational Health and Safety and ISO 14001:2004 for its Environmental Management System. We are also pleased to inform that were no environmental non-conformances during the reporting period. The team is committed to fight complacency and sustain its HSE goals.

Omanisation

Omanisation is a key principle in the human resources strategy of the Company. Key business leaders of DGC and NOMAC Oman are from the local talent pool, which has set a high standard in the local IWPP and IPP sector. This is a result of sustained and focused policy of identifying and grooming people so that the Company remains in line with or ahead of contractual obligations.

NOMAC Oman has a practice of hiring fresh talent from Omani universities and colleges and providing long term training programs leading to employment. Short term summer internships are provided to various students. During 2019, the Company provided about two months training for 10 local fresh engineers from the universities and colleges and hosted 50 students from Salalah College of Technology for a two days visit.

Social responsibility

As part of corporate social responsibility, the Company and NOMAC Oman have jointly reached out to the local community through various methods by sponsoring various events of local importance including helping local schools and assisting in developing medical care for the Dhofar community.

Financial Highlights

La como Chalamant			OMR in MM's		
Income Statement -	2019	2018	2017	2016	2015
Revenue	39.9	39.4	15.4	16.1	21.9
Operating costs	(28.5)	(28.1)	(14.0)	(14.9)	(18.2)
Gross profit	11.4	11.3	1.4	1.2	3.7
Admin, financial and tax costs	(10.7)	(10.9)	(1.9)	(1.4)	(1.3)
Profit/(loss) after tax	0.7	0.4	(0.5)	(0.2)	2.4
Gross profit margin	28.6%	28.7%	9.3%	7.4%	16.9%
Net profit/(loss) margin	1.7%	0.8%	(3.1%)	(1.2%)	10.9%

Revenues

The net revenues have increased by OMR 0.5m compared to the previous year. This is due to the higher fuel revenue of 273MW plant on higher energy delivered during the year.

Operating Costs

There is a net increase of OMR 0.4m in 2019 compared to 2018 due to the higher fuel revenue of 273MW plant on higher energy delivered during the year.

Gross Profit and other costs

The gross profit and other costs are consistent with the last year.

Net Profit after Tax

The increase of OMR 0.3m in net profit after tax is mainly due to lower admin and deferred tax expenses.

			OMR in MM's		
Balance Sheet	2019	2018	2017	2016	2015

Dividend payout ratio (%)	600	-	-	-	-

Income tax

The Company's tax assessments for tax years 2013 and 2014 were finalised during the year with additional tax of OMR275,482 and OMR107,956 for 2013 and 2014 respectively. The additional tax amounts pertain to disallowance of certain interest expenses of the Company. DGC's parent company during 2013 and 2014 (Dhofar Power Company SAOC) had obtained loans from financial institutions on behalf of its subsidiaries and allocated such loans to each subsidiary including DGC, alongwith associated interest cost. Tax Authority ('TA') has assessed these loans to be loans from a related party under the law and has accordingly applied Thin Capitalization rules.

The Company has applied for an objection under Article 160 of the Tax Law. Further, Company has applied for a postponement of payment of the disputed tax until resolution of the objection under Article 162 of the Tax Law. As a matter of prudence, the Company has provided the entire amount in 2019 financial statements under International Financial Reporting Standards. The Company filed the objection on the basis that these loans were effectively obtained from external financial institutions and not from a related party.

This does not have any impact on the cash flow position of the Company for the year ended 31 December 2019.

Cash flows and Dividends

The Company has met its obligations to the lenders by the timely debt service of OMR 13.6m during the year. Interest payments are on a quarterly basis while principal payments are due in July and January of each year.

The Company distributed ordinary dividends of OMR 4m to its shareholders in line with its commitments. The Company's dividend policy of distributing available cash is conditional upon fulfilling of covenants within the Finance Documents which include provisions for forecasted loan payments and operating expenses.

Fuel related receivables and payables

The Company's revenues include capacity and output charges. The capacity portion is received from the offtaker based on availability of the plant and it covers the debt service, equity returns (dividends), tax payments, G&A costs and maintenance related costs. The output revenue includes costs related to recovery of fuel cost payable to the fuel supplier on export of energy and variable O&M charges related to export of energy. As described above, the business earnings are dependent on the capacity revenues and not the fuel revenue. The offtaker has paid entire capacity revenue during 2019 on due dates, however the output revenue has not been reimbursed by the offtaker from June 2019 onwards. Both output revenue receivable and MOG payable is approximately OMR 8.2M as of 31 December 2019.

It is worth mentioning that this issue is common to the entire power sector. While there is a risk of contractual non-compliance by all counter parties, there has been no immediate impact on the business during 2019. The management has engaged with the offtaker and the fuel supplier to ascertain the situation and request for an early resolution of the matter as a mitigant

Brief History of the Project

The Company was incorporated with the commercial registration number 1668714 for an unlimited duration and registered as an SAOC on 28 February 2001. In 2001, DPC, DGC and the Ministry of Housing, Electricity and Water of Oman entered the

Salalah Concession Agreement, a 20 year concession under which DPC became the sole electricity transmission, distribution and supply company within its concession area.

The Salalah Concession Agreement was terminated on 31 December 2013, and all generation activities and assets were transferred to DGC which became a stand-alone entity in which DPC's shares were purchased by EHC and MOF. The Government invited proposals for the acquisition of all shares in DGC and the development of the New Plant in an adjacent site on the following basis:

- The IPP was proposed to have a total aggregate capacity of 718 MW.
- The Project involved the ownership, operation and maintenance of the Original Plant and the design, financing, construction, ownership, operation and maintenance of the New Plant, on a BOO basis, and the capacity of the Plant would be dedicated to, and sell the entirety of its output to OPWP under the PPA.

Following a competitive bidding process run by OPWP, Mitsui & Co., Ltd., ACWA Power and DIDIC (the 'Founders') were awarded the contract to acquire DGC, operate the Original Plant and build the New Plant. EHC and MOF entered into a Share Purchase Agreement with the Founders for the sale of 100% of the shares in DGC on 19 April 2015. The sale and purchase was completed on 4 June 2015. The term of the PPA is 15 years from the COD of the New Plant.

The PFA required the Founders to float 40% of the Shares on the MSM through an IPO. Accordingly, the Company was listed on the Muscat Securities Market on 5 September 2018.

Acknowledgement

The management would like to acknowledge and appreciate the support of the Board under whose guidance 2019 has concluded on a successful note. Most importantly, the management would like to highlight and appreciate the diligent efforts of the entire team whose efforts have brought the year to a positive close.

REPORT OF FACTUAL FINDING

TO THE SHAREHOLDERS OF DHOFAR GENERATING COMPANY SAGG

We have performed the procedures agreed with you pursuant to the Capital Market Authority's (CMA) circular no. E/4/2015, dated 22 July 2015, with respect to the Board of Directors' corporate governance report of Dhofar Generating Company SAOG (the "Company") as at and for the year ended 31 December 2019 and its application of the corporate governance practices in accordance with amendments to CMA Code of Corporate Governance issued under circular no. E/10/2016 dated 1 December 2016 (collectively the "Code"). Our engagement was undertaken in accordance with the International Standard on Related Services applicable to agreed-upon procedures engagements. The procedures were performed solely to assist you in evaluating the extent of the Company's compliance with the Code as issued by the CMA and are summarized as follows:

- We obtained the corporate governance report (the "report") issued by the Board of Directors and checked that the report of the Company includes as a minimum, all items suggested by the CMA to be covered by the report as detailed in the Annexure 3 of the Code by comparing the report with such suggested content in Annexure 3; and
- 2) We obtained the details regarding areas of non-compliance with the Code identified by the Company's Board of Directors for the year ended 31 December 2019. The Company's Board of Directors has not identified any areas of non-compliance with the Code.

We have no exceptions to report in respect of the procedures performed.

Because the above procedures do not constitute either an audit or a review made in accordance with International Standards on Auditing or International Standards on Review Engagements, we do not express any assurance on the corporate governance report.

Had we performed additional procedures, or had we performed an audit or review of the corporate governance report in accordance with International Standards on Auditing or International Standards on Review Engagements, other matters might have come to our attention that would have been reported to you.

Our report is solely for the purpose set forth in the first paragraph of this report and for your information and is not to be used for any other purpose. This report relates only to the accompanying corporate governance report of Dhofar Generating Company SAOG to be included in its annual report for the year ended 31 December 2019 and does not extend to any financial statements of Dhofar Generating Company SAOG, taken as a whole.

Statement of Issue

This report is being presented to comply with the fourteenth principle of the Code of Corporate Governance of Muscat Securities Market (the "MSM") applicable to Public Joint Stock Companies issued vide Circular No E/4/2015 dated 22 July 2015 and further amendments to CMA Code of Corporate Governance issued under circular no. E/10/2016 dated 1 December 2016, (collectively the "Code") issued by Capital Market Authority (the "CMA") for the purpose of establishing a framework of good governance, whereby a listed company is managed in compliance with the best practices of corporate governance.

We are pleased to report that Dhofar Generating Company SAOG (the "Company") remained in compliance with the principles of the Code. The Company was listed on the Muscat Securities Market on 5 September 2018.

Company Philosophy on Code of Governance

The Company is committed to the highest standards of corporate governance. The Company is operating with a set of business principles and corporate conduct is its most important element. These values are reflected in the leadership, management and day to day operations of the Company by the Board of Directors, the management and the employees of the Company.

The Company believes in and practices good corporate governance. The Company's philosophy of the Code of Corporate Governance is aimed at assisting the top management in the efficient conduct of its business and fulfilling its obligations towards all its stakeholders.

The Company has applied the principles of corporate governance in the following manner:

The Company has adopted a Code of Business Conduct and Ethics which is applicable to the employees. The code is intended to govern as a requirement of employment and governs the actions of everyone who works at the Company. This code addresses the following topics:

- Compliance with all Laws, rules, regulations and this Code
- Conflicts of interest and corporate opportunities
- Quality of public disclosures
- Protection and proper use of company assets
- Protection of confidential proprietary information
- Insider trading
- Fair dealing

- Interacting with government
- Environment, health and safety
- Respect for one another

Board of directors

The Company encourages representation of non-executive and independent directors on its Board of Directors. At present the Board consists of seven directors all of which are non-executive directors and three of them are independent directors. All the directors have excellent industry and corporate governance experience. Their experience is complimented by their academic qualifications in the field of administration, management, finance, accounting and engineering.

Board of Directors was elected in April 2018 and will be subject to re-election in March 2021. Six meetings of the Board of Directors were convened during the year on the following dates:

Meeting number	Date of the meeting
BOD meeting #1/2019	14 February 2019
BOD meeting #2/2019	21 April 2019
BOD meeting #3/2019	21 July 2019
BOD meeting #4/2019	7 August 2019
BOD meeting #5/2019	20 October 2019
BOD meeting #6/2019	30 December 2019

These meetings were convened by issuing proper notices along with the agenda and relevant work papers. All the meetings were presided over by the Chairman of the Board or the Deputy Chairman in his absence. The minutes of the meetings were appropriately recorded and circulated.

Details of composition and category of directors and their attendance at the meetings of the Board of Directors are given as under:

Board committees

Audit Committee

The Board of Directors reconstituted the Audit Committee on 26 April 2018 by appointing three directors as Audit Committee members two of which are independent. The Chairman of the Audit Committee is an independent director. These members have required knowledge and experience of accounting, international financial reporting standards and commercial law that enable them to perform their functions. The Committee supports the Board in fulfilling its oversight and review function. The Committee reviews the Company's adherence to policies, procedures, practices and compliance with laws and regulations.

The Committee ensures that the financial statements prepared are in accordance with the International Financial Reporting Standards and the disclosure rules issued by the CMA. A brief description of the terms of reference of the audit committee is as under:

- The audit committee has the power to seek required information and/or presence of any employee of the Company.
- Ensuring adequacy of the control environment and overseeing the issuance of financial statements to the stake holders.
- Acting as a communication channel between Auditors, Management and the Board.

Four meetings of the Board Audit Committee were held during the year with attendance details as follows.

✓ : Present

The Audit Committee heard the views of the external auditors before forwarding the financial statements for the year 2018 to the Board of Directors in their meeting held on 14 February 2019. During this meeting, the views of the auditors were heard separately without the presence of management. In addition, the Audit Committee has also reviewed the reports and views of Internal Audit on quarterly basis. The Audit Committee reviewed and approved the Internal Audit plan for 2019.

By interaction with, and oversight of the Management and the External and Internal Auditors along with evaluation of submitted reports, the Audit Committee reviewed the effectiveness of the internal control system and found it to be adequate and effective.

On a yearly basis, the Audit Committee defines it working plan for the coming year which is presented to the Board. The 2019 Audit Committee plan was approved by the Board on 23 December 2018, while the 2020 Audit Committee plan was approved by the Board on 20 October 2019.

Nomination and Remuneration Committee

The Board of Directors constituted the Nomination and Remuneration Committee on 26 April 2018 by appointing three directors as members, one of whom is independent. These members possess adequate knowledge and experience to carry out their responsibilities diligently. The role of the Committee is to assist the board and the shareholders in the nomination of the most proficient directors and it may also assist the board in selecting the appropriate and necessary executives for the Executive Management, as required. The Committee meets at least 2 times annually.

A brief description of the terms of reference of the Nomination and Remuneration Committee is as under:

- Ensuring the nominated directors possess the necessary skills and abilities as has been defined in the Code.
- Ensure a succession strategy in place for directors and the executive management.

On a yearly basis, the NRC defines it working plan for the coming year which is presented to the Board. The 2019 NRC plan was approved by the Board on 13 December 2018, while the 2020 NRC plan was approved by the Board on 20 October

Two meetings of the Nomination and Remuneration Committee were held during the year on the following dates with details of attendance as under.

Legend: ✓: Present -: Not applicable

Process of nomination of directors

Directors are selected as per the Articles of Association of the Company at the AGM. The process calls for any individual or registered shareholders to file their nominations for the post of directors in prescribed form as stipulated by the CMA. The nomination files are scrutinized as prescribed by the CMA guidelines before being accepted. Elections are held by ballot at the AGM.

Pursuant to the terms of Article 95 of the Commercial Companies Law No 4/1974 as translated and Articles of Association of the Company, the tenure of the members of the Board shall be for three (3) years.

Remuneration

Members of the board and other committees

As approved by the shareholders, members of the Board are entitled to a sitting fee of RO 400 per meeting attended during the year. Audit Committee and Nomination & Remuneration Committee members are entitled to a sitting fee of RO 200 per meeting attended during the year. The sitting fee of directors for the year ended 31 December 2019 amounted to RO 20,400 for the Board and its sub-committee meetings attended during the year. Further, the Company has paid RO 15,000 to directors remuneration for the year 2018, as approved by shareholders at the Annual General Meeting held on 27 March 2019.

Key management personnel

Key management personnel are those executives having powers, authority and responsibility in planning, directing and monitoring the business of the company directly or indirectly. The key management personnel were paid an aggregate amount of RO 224,521 which includes secondment fees, salaries, end of service benefits and performance based bonuses. The performance based bonus is aligned with achievements of objectives set at the beginning of the year. The remuneration paid is commensurate with the qualification, role, responsibility and performance of the executives during the year 2019. The employment contracts stipulate a notice period of three months.

Details of the non-compliance by the Company

There were no penalties or strictures imposed on the Company by CMA, MSM or any other statutory authority on any matter related to capital markets since listing on 5 September 2018.

External quality assessment of internal audit activity of the Company

As per the requirements of the Capital Market Authority (CMA) Decision 10/2018, International Professional Practices Framework (IPPF) and the duly approved Engagement Letter, "External Quality Assessment of Dhofar Generating Company SAOG's Internal Audit Activity" was carried out by "Moore Stephens LLC (External Quality Assessor)".

The External Quality Assessor has concluded that Dhofar Generating Company SAOG's Internal Audit Activity "Generally Conforms to IPPF Standards and the CMA's Decision 10/2018 indicating that an internal audit activity has a charter, policies, and processes, and the execution and results of these are judged to be in conformance with the Standards and local regulatory requirements with some opportunities for improvement.".

Means of Communication with Shareholders and Investors

The Company communicates its financial results and material information by uploading the same on the Muscat Securities Market ('MSM') website. The Company is committed to publishing its quarterly unaudited financial results and annual audited results in two newspapers, English and Arabic. The annual accounts and the Directors' report are dispatched to all the shareholders by mail as required by law and are also available at the Company's Office. The Company discloses its initial and unaudited financial results by uploading the same onto the MSM website. The Company is available to meet its shareholders and their analysts as and when needed.

The Management Discussion and Analysis Report appended to this report assure fair presentation of the affairs of the Company.

Market price and Company's stock performance

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF DHOFAR GENERATING COMPANY SAGG

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Dhofar Generating Company SAOG ("the Company"), which comprise the statement of financial position as at 31 December 2019, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at 31 December 2019, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis of opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (Including International Independence Standards (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in the Sultanate of Oman, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF DHOFAR GENERATING COMPANY SAOG (CONTINUED)

Report on the audit of the financial statements (continued)

Key audit matters (continued)

Key audit matters

Valuation of derivative financial Instruments

The Company has entered into interest rate swap agreements with international banks to hedge interest rate risks. Hedge accounting and the valuation of hedging instruments which is determined through the application of valuation techniques, often involve the exercise of management judgement and the use of assumptions and estimates. Due to the significance of derivative financial instruments and the related estimation uncertainty, this is considered a key audit matter.

The Company's accounting policies and disclosures on derivative financial instruments are disclosed in note 2.3.10 and note 13 to the financial statements.

How our audit addressed the key audit matters

We obtained assurance over the appropriateness of management's assumptions applied in hedge accounting by:

- Assessing the overall process related to derivative instruments and hedge accounting including internal management policies and procedures;
- Evaluating the appropriateness of management's hedge documentation and contracts;
- We involved our internal valuation specialists to assist in with our audit of the valuation model, the price curves, and of unobservable inputs to the model and assessment of hedge effectiveness to ensure the accounting is in line to IFRS 9 financial instruments;
- Obtaining confirmation of year end derivative financial instruments from counterparties.

These contracts are recorded at fair value and qualify for hedge accounting. These contracts give rise to derivative financial liability as disclosed in note 12 and 13 in the financial statements in accordance with IFRS.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF DHOFAR GENERATING COMPANY SAOG (CONTINUED)

Report on the audit of the financial statements (continued)

Other information included in the Company 2019 Annual Report

Those charged with governance and management are responsible for the other information. Other information consists of the information included in the Company's 2019 Annual Report other than the financial statements and our auditor's report thereon. We obtained the following information prior to the date of our auditor's report, and we expect to obtain the published 2019 Annual Report after the date of our auditor's report:

- Chairman's report
- Corporate governance report
- Management discussion and analysis

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of the auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the financial statements. Those charged with governance are responsible for the preparation and fair presentation of the financial statements in accordance with IFRS and the relevant requirements of the Commercial Companies Law, as amended, and the Capital Market Authority ("the CMA") of the Sultanate of Oman, and for such internal control as those charged with governance determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, those charged with governance are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless those charged with governance either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Report on the audit of the financial statements (continued)

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether
 due to fraud or error, design and perform audit procedures responsive to those risks, and
 obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The
 risk of not detecting a material misstatement resulting from fraud is higher than for one
 resulting from error, as fraud may involve collusion, forgery, intentional omissions,
 misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for expressing an opinion on
 the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of those charged with governance use of the going concern
 basis of accounting and, based on the audit evidence obtained, whether a material uncertainty
 exists related to events or conditions that may cast significant doubt on the Company's ability
 to continue as a going concern. If we conclude that a material uncertainty exists, we are
 required to draw attention in our auditor's report to the related disclosures in the financial
 statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are
 based on the audit evidence obtained up to the date of our auditor's report. However, future
 events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including
 the disclosures, and whether the financial statements represent the underlying transactions
 and events in a manner that achieves fair presentation.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF DHOFAR GENERATING COMPANY SAGG (CONTINUED)

Report on the audit of the financial statements (continued)

Auditor's responsibilities for the audit of the financial statements (continued)

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

to Joing LLC

In our opinion, the financial statements comply, in all material respects, with the relevant requirements of the Commercial Companies Law, as amended, and CMA of the Sultanate of Oman.

Bassam Moustafa Hindy

ACTIVITIES

Dhofar Generating Company (the "Company" or "DGC") was registered as a closely held joint stock company ('SAOC') in the Sultanate of Oman on 28 February 2001 under the Commercial Companies Law in Oman. Subsequently, the Company was converted to a Public Joint Stock Company ("SAOG") and was listed on the Muscat Securities Market on 5 September 2018.

The ultimate investors include International Company for Water and Power Projects ("ACWA Power"), Mitsui & Co., Ltd., and Dhofar International Development & Investment Holding Company S.A.O.G ("DIDIC"). The registered address of ACWA Power is 22616, King Abdul Aziz Road, Riyadh, Kingdom of Saudi Arabia. The registered address of Mitsui & Co., Ltd. Marunouchi I-chime, Chiyoda-ku, Tokyo 100-8631, Japan Nippon Life Marunouchi Garden Tower. The registered address of DIDIC is P.O.Box: 2163 Salalah, Postal Code: 211, Sultanate of Oman.

The operations of the Company are governed by the provisions of "the Law for the Regulation and Privatization of the Electricity and Related Water Sector" (the Sector Law) promulgated by Royal Decree 78/2004. The principal activity of the Company is electricity generation under a license issued by the Authority for Electricity Regulation, Oman (AER).

Agreements

The Concession Agreement, to which DGC was a party, was terminated effective 1 January 2014. Accordingly, from 1 January 2014, the Company has been granted a generation license by the AER for the electricity generation business. The Company has entered into a Power Purchase Agreement ('PPA') on 31 December 2013 with Oman Power and Water Procurement Company SAOC ('OPWP') to sell the available capacity of Electricity. The PPA was subsequently amended on 1 January 2014.

A second amendment agreement to the PPA was signed on 19 April 2015 which became effective on 22 June 2015 after completion of all requirements under the terms of the agreement. This amendment agreement envisions the construction of a new 445MW power plant and sets the PPA term of the existing 273MW power plant and new plant for a year of 15 years from the scheduled commercial operation date ('SCOD') of the new plant. The SCOD was achieved on 1 January 2018 as per the plan.

The Company entered into an Engineering, Procurement and Construction ('EPC') contract with SEPCO III Electric Power Construction Corporation for the construction of a new 445MW facility. The Company also entered into a long term loan agreement on 8 July 2015 with a consortium of local and international banks including Bank Muscat SAOG, Bank Dhofar SAOG, Mizuho Bank LTD, Standard Chartered Bank, KfW IPEX- Bank GmbH, Sumitomo Mitsui Trust Bank Limited and Sumitomo Mitsui Bank Corporation.

The Company has signed an Operations and Maintenance Agreement with Dhofar O&M Company LLC effective 4 June 2015 for all operations and maintenance of the plants.

SIGNIFICANT ACCOUNTING POLICIES 2

2.1 Basis ofpreparation

These financial statements have been prepared in accordance with International Financial Reporting Standard (IFRS) and the requirements of the Commercial Companies Law of the Sultanate of Oman, as amended and the Capital Market Authority.

The new Commercial Companies Law promulgated by the Royal Decree No. 18/2019 (the Commercial Companies Law of the Sultanate of Oman) was issued on 13 February 2019 which has replaced the Commercial Companies Law of 1974. As per the articles of the Royal Decree No. 18/2019, the new Commercial Companies Law has come into force on 17 April 2019 and the companies should comply with the new law within 1 year from 17 April 2019.

For the year ended 31 December 2019 (continued)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

2.1 Basis of preparation (continued)

The financial statements have been prepared on a historical cost basis, except for derivative financial instruments carried at fair value.

The financial statements have been presented in Rial Omani which is the functional and reporting currency for these financial statements.

2.2 Changes in accountingpolicies

The accounting policies are consistent with those in the previous years except as following;

2.2.1 Adoption of new and revised international financial reporting standards (IFRSs)

For the year ended 31 December 2019, the Company has adopted all of the new and revised standards and interpretations issued by the International Accounting Standards Board (IASB) and the International Financial Reporting Interpretations Committee (IFRIC) of the IASB that are relevant to its operations and effective for years beginning on or after 1 January 2019.

For the year ended 31 December 2019, the Company has adopted all of the new and revised standards and interpretations issued by the International Accounting Standards Board (IASB) and the International Financial Reporting Interpretations Committee (IFRIC) of the IASB that are relevant to its operations and effective for years beginning on or after 1 January 2019.

- FRS 16 Leases
- FRIC Interpretation 23 Uncertainty over Income Tax Treatment
- Amendments to IFRS 9: Prepayment Features with Negative Compensation
- Amendments to IAS 19: Plan Amendment, Curtailment or Settlement
- Annual IFRS Improvement Process
 - IAS 12 Income Taxes Income tax consequences of payments on financial instruments classified as equity
 - IAS 23 Borrowing Costs Borrowing costs eligible for capitalization

The above standards, other than IFRS 16 Leases, do not have any significant impact on the financial statements of the Company.

IFRS16

IFRS 16 supersedes IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognise most leases on the balance sheet.

Lessor accounting under IFRS 16 is substantially unchanged from IAS 17. Lessors continue to classify leases as either operating or finance leases using similar principles as in IAS 17. Therefore, IFRS 16 does not have an impact for leases where the Company is the lessor.

The Company adopted IFRS 16 using the modified retrospective method of adoption with the date of initial application of 1 January 2019. Under this method, the standard is applied retrospectively with the cumulative effect of initially applying the standard recognised at the date of initial application. Accordingly, the comparatives are not restated.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Changes in accounting policies (continued)

IFRS 16 (continued)

Nature of effect of adoption of IFRS 16:

The Company has recognised leases on land rent, connection fees and office premises rent in compliance with IFRS

Before the adoption of IFRS 16, the Company classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease.

Upon adoption of IFRS 16, the Company applied a single recognition and measurement approach for all leases except for short-term leases and leases of low-value assets. The Company recognised lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets. For the leases previously classified as operating leases, the lease liabilities were recognised based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

Practical expedients:

The Company elected to use the transition practical expedient to not reassess whether a contract is, or contains a lease at 1 January 2019. Instead, the Company applied the standard only to contracts that were previously identified as leases applying IAS 17 and IFRIC 4 at the date of initial application. The Company also elected to use the recognition exemptions for lease contracts that, at the commencement date, have a lease term of 12 months or less and do not contain a purchase option ('short-term leases'), and lease contracts for which the underlying asset is of low value ('lowvalue assets').

Impact on transition

The transition of IFRS 16 impacted to the financial statements on 1 January 2019 as follow.

	2019
	RO
Right of use assets	4,141,145
Lease liabilities	(4,431,119)
Impact on equity	(289,974)
Deferred tax impact on retained earnings adjustment (note 19)	43,496
Net impact on equity	(246,478)

The Company has used incremental borrowing rate of 5.75% pa in recognition of lease liabilities.

Reconciliation with operating lease commitments

The lease liabilities as at 1 January 2019 can be reconciled to the operating lease commitments as of 31 December 2018, as follows:

Operating lease commitments Weighted average incremental horrowing rate	8,547,835
Weighted average incremental borrowing rate	5.75%
Discounted operating lease commitments as at 1 January 2019	4,431,119

2.2.3 Standard issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. The Company intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

- IFRS 17 Insurance Contracts
- Amendments to IFRS 3: Definition of a Business
- Amendments to IAS 1 and IAS 8: Definition of Material
- Amendment to IFRS 9: Interest Rate Benchmark Reform

For the year ended 31 December 2019 (continued)

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Changes in accounting policies (continued)

2.2.4 Interest Rate Benchmark Reform

Phase 1 Interest Rate Benchmark Reform (IBOR) Amendments to IFRS 9, IAS 39 and IFRS 7 were published by the IASB in September 2019, which includes a number of reliefs, which apply to all hedging relationships that are directly affected by interest rate benchmark reform. The Company is assessing the impact of Phase 1 IBOR amendments which are effective for annual periods beginning on or after 1 January 2020.

2.3 Summary of significant accounting policies

Following are the significant accounting policies adopted by the Company;

2.3.1 Current versus non-current classification

The Company presents assets and liabilities in the statement of financial position based on current / non- current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Expected to be realised within twelve months after the reporting year, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting year
- Held primarily for the purpose oftrading

All other assets are classified asnon-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting year, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting year

The Company classifies all other liabilities as non-current.

2.3.2 Fair value measurement

The Company measures financial instruments such as derivatives at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability,or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantages market must be accessible by the company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies(continued)

Fair value measurement (continued)

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets orliabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement isunobservable

For assets and liabilities that are recognised in the financial statements at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting year.

2.3.3 Revenue recognition

The Company's business is to generate and supply electricity to its sole customer OPWP under long term PPA. Revenue from OPWP comprises of the following:

- Capacity charge covering the investment charge and fixed operation and maintenance charge; and
- Output charge covering the fuel charge and variable operation and maintenance charge.

The PPA of the Company is finance lease arrangement for the existing 273 MW power plant and operating lease arrangement for the new 445MW power plant.

Revenue from lease contracts

The treatment for 273 MW plant is a finance lease arrangement and lease interest income is recognised in the statement of comprehensive income. Capacity charge covering the investment charge receiving under the PPA is finance lease payments and accounted based on IFRS 16.

The investment charge of 445 MW plant has been treated as containing a lease which conveys the right to use the underlying assets in exchange of consideration. This component of revenue is recognised on straight line basis over the lease term to the extent that capacity has been made available based on contractual terms of PPA and accounted based on IFRS 16.

Revenue from contracts with customers

Fixed operation and maintenance charges are recognised as revenue when the capacity is made available by performing required planned and unplanned maintenance on timely basis so that the plant is in a position to run and generate required output and accrue to the business over time. Output charges are recognised as revenue upon delivery of electricity to the national grid which accrue over time when the customer accepts deliveries and there is no unfulfilled performance obligation that could affect the customer's acceptance of the project. Amounts received in relation to electricity energy charges are contingent rental receipts. Revenue from contracts with customers is accounted based, on IFRS 15.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies(continued)

Revenue from contracts with customers (continued)

The Company has long term agreements with OPWP which determine performance obligation, transaction price and allocates the transaction price to each of the separate performance obligations. Accumulated experience is used to estimate and provide for the discounts, using the expected value method, and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur.

There is no significant financing component attached to the receivable from customer. Goods and services are provided on agreed credit terms of the contract and payment occurs within 25 days from the submission of invoice. Company submits invoices on monthly basis in arrears and generally are submitted on or before the 5th day of the subsequent month.

2.3.4 Taxes

Current income tax

Taxation is provided in accordance with Omani fiscal regulations.

Income tax is recognised in the statement of comprehensive income except to the extent that it relates to items recognised in the statement of comprehensive income or directly in equity, in which case it is recognised in the statement of comprehensive income or directly in equity, respectively. Current tax is the expected tax payable on the taxable income for the year or relating to previous years as a result of tax assessment, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax

Deferred income tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax laws that have been enacted at the reporting date.

Deferred income tax assets are recognised for all deductible temporary differences, carry-forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available, against which the deductible temporary differences and the carry-forward of unused tax credits and unused tax losses can be utilised except when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred income tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are offset as there is a legally enforcement to offset these in Oman.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies(continued)

2.3.5 Foreign currencies

The Company's financial statements are presented in Omani Rials, which is also the company's functional currency. Transactions in foreign currencies are initially recorded by the Company at its functional currency spot rates at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

2.3.6 Plant and equipment

Capital work in progress is stated at cost, net of accumulated impairment losses, if any.

Depreciation of capital work in progress commences when the assets are ready for the intended use.

Plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in statement of comprehensive income as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision aremet.

Depreciation is calculated on a straight line basis over the estimated useful lives of assets as follows:

	Years
Plant, machinery, civil and structural works	40
Decommissioning assets	40
Plant capital spares and other equipment	18
Computer and equipment	5
Motor vehicle	5
Furniture and fixtures	5
Computer software	5

The carrying values of equipment are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. If any such indication exists and where the carrying values exceed the estimated recoverable amount, the assets are written down to their recoverable amount, being the higher of their fair value less costs to sell and their value in use.

Expenditure incurred to replace a component of an item of property, equipment that is accounted for separately is capitalised and the carrying amount of the component that is replaced is written off. Other subsequent expenditure is capitalised only when it increases future economic benefits of the related item of property, equipment. All other expenditure is recognised in the statement of comprehensive income as the expense is incurred.

For the year ended 31 December 2019 (continued)

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.6 Plant and equipment (continued)

When each major inspection is performed, its cost is recognised in the carrying amount of the property, equipment as a replacement if the recognition criteria are satisfied.

An item of property, equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement or profit or loss in the year the asset is derecognised.

The assets' residual values, useful lives and methods are reviewed, and adjusted prospectively, if appropriate, at each financial year end.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposal of property, plant and equipment are determined by reference to their carrying amounts.

2.3.7 Leases

Leases (Applicable from 1st Jan 2019)

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

a. Right of use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right of use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right of use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Company is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognised right of use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right of use assets are subject to impairment.

b. Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in- substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating a lease, if the lease term reflects the Company exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognised as expense in the period on which the event or condition that triggers the payment occurs.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.7 Leases (continued)

In calculating the present value of lease payments, the Company uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., a changes in future payments resulting from a change in index or rate used to determine such lease payments) or a change in the assessment to purchase the underlying asset.

c. Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of comprehensive income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases (applicable before 1 January 2019)

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset (or assets) and the arrangement conveys a right to use the asset (or assets), even if that asset is (or those assets are) not explicitly specified in an arrangement.

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Finance lease as a lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Company's net investment in the leases. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income.

For the year ended 31 December 2019 (continued)

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.8 Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

he classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under IFRS 15.

In order for a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial asset with cash flow that are not SPPI are classified and measured at fair value through profit & loss irrespective of business model.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. The Company does not have any financial instrument that are measured either of FVOCI or FVPL except for the derivative instrument that are used as hedge instrument.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

Financial assets at amortized cost (debt instruments)

This category is the most relevant to the Company. The Company measures financial assets at amortized cost if both of the following conditions are met:

- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments), and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.8 Financial assets (continued)

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in statement of comprehensive income when the asset is derecognised, modified or impaired.

The Company's financial assets at amortized cost includes trade receivables and finance lease receivable.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a company of similar financial assets) is primarily derecognised (i.e., removed from the Company's statement of financial position) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass- through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

The Company recognises an allowance for Expected Credit Losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables covering user IFRS 15, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment. For finance lease receivable, the company applies general approach in calculating the ECL and is determined by using the probability of default (PD), exposure at default (EAD) and loss given default (LGD).

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.9 Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, bank borrowings and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by IFRS 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of comprehensive income.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Company has not designated any financial liability as at fair value through profit or loss.

Financial liabilities at amortized cost (loans and borrowings)

This is the category most relevant to the Company. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the EIR method. Gains and losses are recognised in statement of comprehensive income when the liabilities are derecognised as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of comprehensive income.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of comprehensive income.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.10 Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Company uses derivative financial instruments, such as interest rate swaps to hedge interest rate risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment
- Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment

At the inception of a hedge relationship, the Company formally designates and documents the hedge relationship to which it wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge.

The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined). A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is 'an economic relationship' between the hedged item and the hedging instrument
- The effect of credit risk does not 'dominate the value changes' that result from that economic relationship
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually uses to hedge that quantity of hedged item.

Hedges that meet all the qualifying criteria for hedge accounting are accounted for, as described below:

Cash flow hedges

TheeffectiveportionofthegainorlossonthehedginginstrumentisrecognisedinOClinthecashflowhedge reserve, while any ineffective portion is recognised immediately in the statement of comprehensive income. The cash flow hedge reserve is adjusted to the lower of the cumulative gain or loss on the hedging instrument and the cumulative change in fair value of the hedgeditem.

The amounts accumulated in OCI are accounted for, depending on the nature of the underlying hedged transaction. If the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is removed from the separate component of equity and included in the initial cost or other carrying amount of the hedged asset or liability. This is not a reclassification adjustment and will not be recognised in OCI for the year. This also applies where the hedged forecast transaction of a non-financial asset or non-financial liability subsequently becomes a firm commitment for which fair value hedge accounting is applied.

If cash flow hedge accounting is discontinued, the amount that has been accumulated in OCI must remain in accumulated OCI if the hedged future cash flows are still expected to occur. Otherwise, the amount will be immediately reclassified to statement of comprehensive income as a reclassification adjustment.

After discontinuation, once the hedged cash flow occurs, any amount remaining in accumulated OCI must be accounted for depending on the nature of the underlying transaction as described above.

For the year ended 31 December 2019 (continued)

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.11 Inventories

Inventories are stated at the lower of cost and net realizable value. Costs are those expenses incurred in bringing each product to its present location and condition. Cost is calculated using the weighted average method. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

2.3.12 Provisions

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Decommissioning liability

The Company records a provision for decommissioning costs as there is a present obligation as a result of activities undertaken pursuant to the Usufruct and PPA. Decommissioning costs are provided for at the present value of expected costs to settle the obligation using estimated cash flows and are recognised as part of the cost of the relevant asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognised in the statement of comprehensive income as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs, or in the discount rate applied, are added to or deducted from the cost of the asset except for the asset given on finance lease.

Major maintenance

Provision for major maintenance is created to meet the contractual obligations under the PPA. This expenditure is expected to be incurred over the PPA term and would enable the Company to fulfill its obligations under the PPA. In order to be able to honor its contractual obligations towards the off-taker over the non-cancelable term of the PPA, the Company had the unavoidable contractual obligation to carry major maintenance activities.

2.3.13 Employee benefits

End of service benefits are accrued in accordance with the terms of employment of the Company's employees at the reporting date, having regard to the requirements of the Oman Labor Law 2003 and its amendment and IAS-19 'Employee benefits' as amended. Employee entitlements to annual leave and Air passage are recognised when they accrue to employees and an accrual is made for the estimated liability arising as a result of services rendered by employees up to the reporting date. These accruals are included in current liabilities, while that relating to end of service benefits is disclosed as a non-current liability. Contributions to a defined contribution retirement plan and occupational hazard insurance for Omani employees in accordance with the Omani Social Insurances Law of 1991 are recognised as an expense in the statement of comprehensive income as incurred.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued)

Summary of significant accounting policies (continued)

2.3.14 Trade receivable

A receivable is recognised if an amount of consideration that is unconditional as due from the customer (i.e. only the passage of time is recognised balance payment of the consideration is due).

2.3.15 Cash and cash equivalents

For the purpose of the statement of cash flows, the Company considers all bank and cash balances that are free of lien.

2.3.16 Trade and other payable

Liabilities are recognised for the amount to be paid for goods and services rendered, whether or not billed to the company.

2.3.17 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

2.3.18 Share capital

Share capital is recorded at the proceeds received.

2.3.19 Dividend on ordinary shares

Dividends on ordinary shares are recognised as a liability and deducted from equity when they are approved by the Company's shareholders.

2.3.20 Directors' remuneration

The Directors' remuneration is governed by the Memorandum of Association of the company and the Commercial Companies Law.

The Annual General Meeting shall determine and approve the remuneration and the sitting fees for the Board of Directors and its sub-committees and the distribution of dividends to the shareholders.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued) 2

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS 3

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amount of financial assets and liabilities at the date of the financial statements and the resultant provisions and changes in fair value for the year. Such estimates are necessarily based on assumptions about several factors involving varying, and possibly significant, degrees of judgment and uncertainty and actual results may differ from management's estimates resulting in future changes in estimated assets and liabilities.

The following are the significant estimates used in the preparation of the financial statements:

3.1 Determining the lease term of contracts with renewal and termination options-Company as lessee

The Company has one lease contract that includes extension and termination options. The Company applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate.

3.2 Leases - Estimating the incremental borrowing rate

Company cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Company would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Company 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity- specific estimates

3.3 Leases - Identification of lease and lease classification

The Company has entered into the PPA with OPWP to generate electricity and make available the power capacity from its Plant. The PPA covers both the plants i.e 273 MW power plant and 445 MW power plant. Management considers the requirements of IFRS 16 (till 31 December 2018: IFRIC 4 "Determining Whether an Arrangement Contains a Lease"), which sets out guidelines to determine when an arrangement might contain a lease.

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date whether fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

For the year ended 31 December 2019 (continued)

SIGNIFICANT ACCOUNTING POLICIES (continued) 2

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued) 3.

3.3 Leases - Identification of lease and lease classification (continued)

Finance lease *(I)*

Based on management's evaluation, the PPA with OPWP with respect to 273 MW power plant has been classified as a finance lease under IFRS 16 (till 31 December 2018: IAS 17), since significant risks and rewards associated with the ownership of the plant are transferred to OPWP. As per the terms of PPA, the power generation is dependent on the Company's plant and OPWP, being the sole procurer of power generation in Oman, obtains significant amount of the power generated by the Company's plant. accordingly, management has concluded that the PPA satisfies the requirements of IFRS 16 (till 31 December 2018: IFRIC 4 "Determining Whether an Arrangement Contains a Lease"). Further management has assessed the lease classification as per the requirements of IFRS 16 (till 31 December 2018 : IAS 17) and has concluded that the arrangement is a finance lease, as the term of PPA is for the major part of the remaining economic life of the Company's plant. Accordingly, a finance lease receivable has been recognised in the financial statements.

The primary basis for this conclusion being that the PPA is for substantial portion of the life of the plant and the present value of minimum lease payments substantially equates the fair value of the plant at the inception of the lease.

Operating lease

Based on management's evaluation, the PPA with OPWP with respect to 445 MW power plant has been classified as a operating lease under IFRS 16 (Till 31 December 2018: IAS 17) since significant risks and rewards associated with the ownership of the plant lies with the Company. The primary basis for this conclusion is that the PPA is for a term of 15 years while the economic life of the power plant is estimated to be forty years. The present value of minimum lease payments under the PPA does not substantially recover the fair value of the plant at the inception of the lease. Further, the residual risk is borne by the Company.

3.4 Provision for decommissioning obligation

UponexpiryoftheirrespectiveUsufructandPPA,theCompanywillhaveanobligationtoremovethefacilities and restore the affected area. The estimated cost, discount rate and risk rate used in the provision for decommissioning costs calculation is based on management's bestestimates.

3.5 Provision for major maintenance

With respect to 273 MW power plant, the company has an unavoidable contractual obligation of plant is being available to generate the electricity over the term of the PPA which requires performance of certain activities. Accordingly, it is considered appropriate to createa provision for major maintenance as the unavoidable costs of mid-life revision based on best estimates.

3.6 Useful lives and residual value of equipment

Depreciation is charged so as to write off the cost of assets, less their residual value, over their estimated useful lives. The calculation of useful lives is based on management's assessment of various factors such as the operating cycles, the maintenance programs, and normal wear and tear using its best estimates. The calculation of the residual value is based on the management best estimates.

For the year ended 31 December 2019 (continued)

2 SIGNIFICANT ACCOUNTING POLICIES (continued)

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

3.7 Going concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

3.8 Taxes

Uncertainties exist with respect to the interpretation of tax regulations and the amount and timing of future taxable income. Given the wide range of business relationships and nature of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded.

The Company establishes provisions, based on reasonable estimates, for possible consequences of finalization of tax assessments of the company. The amount of such provisions is based on various factors, such as experience of previous tax assessments and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

3.9 Impairment of finance lease receivables

The Company assesses on a forward looking basis the expected credit losses associated with its finance lease receivable, carried at amortized cost. The impairment provisions for financial lease receivable was assessed based on the ECL model, using assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the past history, existing market conditions as well as forward looking estimates at the end of each reporting year. As at the reporting date, the impairment impact is considered to be immaterial.

3.10 Impairment of non-financial assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs of disposing of the asset.

The value in use calculation is based on a DCF model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the performance of the assets of the CGU being tested. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. These estimates are most relevant to right of use and property , plant and equipment recognised by the Company.

3.11 Provision for expected credit losses of trade receivables and contract assets

The Company uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on the Company's historical observed default rates.

The provision matrix is initially based on the Company's historical observed default rates. The Company will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

For the year ended 31 December 2019 (continued)

2 **SIGNIFICANT ACCOUNTING POLICIES (continued)**

3. **CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)**

3.11 Provision for expected credit losses of trade receivables and contract assets (continued)

Company uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns (i.e., by geography, product type, customer type and rating, and coverage by letters of credit and other forms of credit insurance). The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Company's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future.

	11,168,792	3,226,837
(i) The aging of unimpaired trade receivables at the reporting date was:		
Less than 30 days	3,985,965	2,681,517
30 to 90 days	2,717,334	-
90 to 365 days	4,327,084	
	11,030,383	2,681,517

- (ii) Trade receivables are non-interest bearing and are on terms of 25 days.
- (iii) The Company calculated the ECL for trade receivables and recognised a provision in the statement of comprehensive income.
- (iv) Trade receivable includes OMR 8,214,089 outstanding from OPWP against the fuel cost allowance which is overdue as on reporting date.

8 ADVANCES ANDPREPAYMENTS

	2019	2018
	RO	RO
Advances and others	4,328	6,675
Prepaid expenses	265,272	166,576
	269,600	173,251
9 CASH AND CASHEQUIVALENTS		
	2019	2018
	RO	RO
Cash at bank	6,279,047	10,104,872
Cash in hand	365	1,840
	6,279,412	10,106,712

Cash at bank balances are with commercial banks in Oman and are denominated in Omani Rial. Bank balances are placed with reputed financial institutions. The management believes that the ECL is immaterial at the financial statement as a whole and hence not recognised in these financial statements.

For the year ended 31 December 2019 (continued)

10 SHARE CAPITAL

The authorised share capital of the Company as at 31 December 2019 is RO 120,000,000 (31 December 2018: RO 120,000,000). Issued and paid up capital as at 31 December 2019 is RO 22,224,000 (31 December 2018: RO 22,224,000). The Company has one class of ordinary shares which carry no right to fixed income.

Shareholders who own 10% or more of the Company's share capital at the reporting date are:

	31 December 2019		31 Decemb	er 2018
	Percentage shareholding	No. of shares	Percentage shareholding	No. of shares
MAP Power Holding Company Limited	27%	60,004,800	27%	60,004,800
Mitsui & Co. Middle East and Africa Projects				
Investment & Development Limited	27%	60,004,800	27%	60,004,800

11 LEGAL RESERVE

In accordance with the article 132 of the Commercial Companies Law applicable to companies registered in the Sultanate of Oman, 10% of a company's net profits after the deduction of taxes will be transferred to a non-distributable statutory reserve each year until the amount of such legal reserve has reached a minimum of one third of that Company's issued share capital. This reserve is not available for distribution to shareholders as dividends.

12 CASH FLOW HEDGE

The USD long term facilities of the Company bear interest at US LIBOR plus applicable margins. The Company has fixed the rate of interest through Interest Rate Swap agreements ("IRS") entered into with various international banks for the facilities.

	2019	2018
	RO	RO
At the beginning (A)	(1,222,955)	(4,444,370)
Change in fair value during the year	(4,883,657)	3,789,899
Less: related deferred tax asset (note 19)	732,548	(568,484)
Change in fair value of hedge during the year (B)	(4,151,109)	3,221,415
Change in fair value of hedge - net of tax $(C) = (A) + (B)$	(5,374,064)	(1,222,955)

All the interest rate swaps are designated and effective as cash flow hedges and the fair value thereof has been recognised directly in other comprehensive income and presented in statement of changes in equity, net of related deferred tax.

For the year ended 31 December 2019 (continued)

13 DERIVATIVE FINANCIAL INSTRUMENTS

The Company's main interest rate risk arises from long-term borrowings with variable rates, which expose the Company to cash flow interest rate risk. The Company has entered into five interest rate swap agreements with five international banks at fixed interest rates ranging from 2.1% - 2.4% per annum. During the current year, the Company's borrowings at variable rate were entirely denominated in US Dollars.

The Company manages its cash flow interest rate risk by using floating-to-fixed interest rate swaps. Under these swaps, the Company agrees with other parties to exchange, at specified intervals (quarterly), the difference between fixed contract rates and floating rate interest amounts calculated by reference to the agreed notional principal amounts.

14 PROVISION FOR DECOMMISSIONING COSTS

	2019	2018
	RO	RO
At the beginning	4,067,655	3,000,900
Provision made during the period	-	928,519
Unwinding of discount on decommissioning cost provision (Note 24)	143,847	138,236
	4,211,502	4,067,655

The Company is committed under the lease agreement to decommissioning the site as a result of construction of the power plant. Decommissioning costs represents the present value of management's best estimate of the future outflow of the economic benefits that will be required to remove the facilities and restore the affected area at the Company's rented sites. The cost estimate has been discounted to present value using the pre tax rate that reflects the risk specific to the decommissioning liability.

For the year ended 31 December 2019 (continued)

15 PROVISION FOR MAJOR MAINTENANCE

To meet the obligations under the PPA, major maintenance and upgradation will have to be performed on the power generation assets. This expenditure is expected to be incurred over the PPA term and would enable the Company to fulfil its obligations under the PPA. A provision has been created based on the present value of future cash outflows that will be required for major maintenance and upgradation activities.

	2019	2018
	RO	RO
At the beginning	3,917,732	4,423,638
Unwinding of discount on major maintenance (note 24)	116,881	125,502
Payments made during the year	(320,804)	(631,408)
	3,713,809	3,917,732
16 LONG TERM LOAN		
	2019	2018
	RO	RO
At the beginning	161,332,749	152,502,471
Received during the year	-	13,074,003
Paid during the year	(7,089,986)	(4,243,725)
Gross loan amount	154,242,763	161,332,749
Less: unamortised arrangement fee	(1,539,050)	(1,728,219)
	152,703,713	159,604,530
Current and non-current classification of the team is as follows;		
Non-current portion	145,446,509	152,625,279
Current portion	7,257,204	6,979,251
	152,703,713	159,604,530

The loan facility of RO 168,609,121 (USD 437,832,047) was provided by a consortium of local and international banks in pursuance with the PPA to finance the project cost. This loan is repayable in 31 semi- annual instalments starting from 31 July 2018.

According to Common Term Agreement the term loan facility comprises of:

	Currency	Total facility	Interest rates	Final repayment date
1	RO	72,999,959	4.6% perannum	31 December 2032
2	USD	248,271,000	LIBOR + 1.4% perannum	31 December 2032

The repayment schedule of gross term loan is as follows:

For the year ended 31 December 2019 (continued)

16 LONG TERM LOAN (continued)

	2019	2018
	RO	RO
Payable within one year	7,363,186	7,089,985
Payable between 1 and 2 years	7,305,234	7,363,186
Payable between 2 and 5 years	23,076,393	22,596,221
Payable after 5 years	116,497,950	124,283,357
	154,242,763	161,332,749

The Company hedges USD portion of the loan for interest rate risk via an interest rate swap arrangement as explained in note 12 and 13.

The loan is secured by a charge on all project assets, assignment of insurance / reinsurances, agreement for security over promoters' shares and charge over the Company's project accounts. The weighted average effective interest rate on the bank loans is 3.83% per annum (31 December 2018: 3.61%) for USD facility and 4.60% per annum (31 December 2018: 4.60%) for OMR Facility (overall effective rate 4.13% per annum) (31 December 2018: 4.02%) . The loan is subject to certain covenants relating to maintenance of Debt Service Coverage Ratio.

Also as of 31 December 2019, the Company has undrawn working capital facility amounting to RO 7,700,000 (31 December 2018 - RO 7,700,000) with the interest rate of 3.5% per annum (31 December 2018 - 3.5%).

17 TRADE AND OTHERPAYABLES

Other payables	1,200	6,759
	12,456,981	6,553,439

Trade payables includes OMR 8,197,620 payable to Ministry of Oil and Gas against the Fuel Cost which is overdue as on the reporting date.

18 LEASES

Company as a lessee

The Company adopted IFRS 16 using retrospective method of adoption with the date of initial application on 1 January 2019. The following contracts are covered under IFRS16;

- The Usufruct agreement with 40 years lease term.
- The Electrical Connection agreement with 20 years lease term.
- Two Electrical connection agreements with a lease term of 15 years each
- The office rent agreement with 3 years lease term.

For the year ended 31 December 2019 (continued)

18 LEASES (continued)

At 31 December	383,438	(104,009)

For the year ended 31 December 2019 (continued)

19 TAXATION (continued)

The total income tax for the current year tax can be reconciled to the accounting profits as follows;

	2019	2018
	RO	RO
Accounting profit before tax for the year	3,280,518	3,227,144
Tax at the rate of 15%	492,078	484,072
Add tax effect of:		
Deferred tax not recognised on tax losses	1,753,137	2,386,977
Current tax for previous years	383,438	(154,809)
Expenses not allowed in tax	662	1,216
Income tax reversal	<u>-</u>	150,408
Tax expense for the year	2,629,315	2,867,864

Tax assessments of tax years 2013 and 2014 have been completed during the year. These assessments resulted in additional tax of OMR 383,438 which is fully provided in these financial statements. However, this does not have an impact on the cash position of the Company at the reporting date. The Company has filed an Objection under the Income Tax law with the Tax Authority relating to the tax assessments of 2013 and 2014. Management considers that the amount of additional taxes, if any, that may become payable on finalization of the open tax years would not be material to the Company's financial position as at 31 December 2019.

The provision for the current and deferred tax have been recorded based on the finance lease model. Further, in respect of the unrealised gain of RO 22,989,752 (the difference between the fair value of plant and finance lease receivable) management has taken a view that this gain will be realised as a part of tariff received over the life of the PPA and only realised gain should be subjected to tax as per the Income Tax Law.

The management believes that future taxable profit will not be sufficient to offset the carried forward tax losses, hence, no deferred tax asset has been recognised on carried forward tax losses.

Deferred tax

Deferred taxes are calculated on all temporary differences under the liability method using a principal tax rate of 15%. The net deferred tax liability and deferred tax charge in the statement of comprehensive income are attributable to the following items;

For the year ended 31 December 2019 (continued)

Interest income on finance lease	4,553,533	4,730,626
Investment charge revenue	12,507,810	12,544,440
	17,061,343	17,275,066
	39,909,391	39,397,336

^{*} On 20 February 2017, through Royal Decree 9/2017, income tax rate applicable on the Company has been increased from 12% to 15%. This increase falls under the provisions of material adverse change under the PPA. The Company is entitled to recover this incremental tax from the off taker and accordingly this was recognised as a receivable from off taker as on 31 December 2017. However, this was reversed during 2018 as the current tax liability for 2017 was nil computed based on the Income Tax Law Oman.

For the year ended 31 December 2019 (continued)

23 EMPLOYEE COSTS

Salaries and the related costs included under operating costs consist of the following:

	2019	2018
	RO	RO
Salaries, wages and other benefits	550,958	607,174
Contributions to a defined contribution retirement plan	11,602	17,673
Charge for employee end of service benefits	8,439	20,627
	570,999	645,474
24 FINANCE COSTS		
	2019	2018
	RO	RO
Interest on long term loan	6,562,695	6,791,525
Interest on finance lease (note 18)	254,790	-
Amortisation of deferred financing cost	189,169	200,222
Unwinding of discount on decommissioning cost provision (note 14)	143,847	138,236
LC commission	126,931	138,757
Unwinding of discount on major maintenance (note 15)	116,881	125,502
Interest on working capital facility	29,918	-
Commitment fee		12,130
	7,424,231	7,406,372
25 EARNINGS PER SHARE		
	2019	2018
	RO	RO
Profit for the year	651,203	359,280
Weighted average number of ordinary shares 22	22,240,000	95,865,600
	0.003	0.004

Diluted earnings per share is same as the earnings per share as the Company has not issued any instruments during the year which would have an impact on earnings per share when exercised.

For the year ended 31 December 2019 (continued)

26 RELATED PARTY TRANSACTIONS

Related parties comprise the shareholders, directors, key management personnel and business entities in which they have the ability to control or exercise significant influence in financial and operating decisions.

The Company maintains balances with these related parties which arise in the normal course of business from the commercial transactions, and are entered into at terms and conditions which are approved by the management.

Significant related party balances and transactions for the year ended 31 December 2019 are as follows:

Balances at year end	2019	2018
	RO	RO
Due from related parties		
Shinas Generating Company SAOC	-	114
International Company for Water and Power Projects	<u> </u>	34
		148

Goods and services received	8,070,048	7,872,170
Goods and services rendered	119,666	279,048

Key management personnel compensation

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including any director (whether executive or otherwise). The compensation for key managerial personnel during the year are as follows:

	2019	2018
	RO	RO
Short-term employee benefits	224,521	334,129
Long-term employee benefits	8,338	10,265
Director sitting fees, remuneration and travelling expenses	39,129	16,000
	271,988	360,394

Amounts due from/to related parties are interest free, unsecured and receivable on demand. Amount due from related parties are subject to the impairment requirement of IFRS 9, and were assessed as such and management believes the identified impairment loss was immaterial.

For the year ended 31 December 2019 (continued)

27 FINANCIAL RISK MANAGEMENT

The Company's principal financial liabilities, other than derivatives, comprise loans, and trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include finance lease receivable, trade receivables, and cash that derive directly from its operations.

Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on risk.

The sensitivity analyses in the following sections relate to the position as at 31 December 2019 and 31 December 2018.

The sensitivity analyses have been prepared on the basis that the amount of net debt, the ratio of fixed to floating interest rates of the debt and derivatives at 31 December 2019.

The following assumptions have been made in calculating the sensitivity analyses:

- The sensitivity of the relevant statement of comprehensive item is the effect of the assumed changes in respective market risks. This is based on the financial assets and financial liabilities held at 31 December 2019 and 31 December 2018 including the effect of hedge accounting.
- The sensitivity of equity is calculated by considering the effect of any associated cash flow hedges for the effects of the assumed changes of the underlying risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates. The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings.

To manage this, the Company enters into interest rate swaps, in which it agrees to exchange, at specified intervals, the difference between fixed and variable rate interest amounts calculated by reference to an agreed-upon notional principal amount.

At 31 December 2019, after taking into account the effect of interest rate swaps, 42% of the Company's borrowings are at a fixed rate of interest (31 December 2018: 42%).

At the reporting date the interest rate risk profile of the Company's interest bearing financial instruments is as follows:

	2019	2018
	RO	RO
Fixed rate instrument Term loan	65,178,049	68,174,050
Variable rate instrument Term Ioan	89,064,714	93,158,699

Interest rate sensitivity

The Company does not account for any fixed rate financial assets or financial liabilities at fair value through profit or loss. Therefore, a change in interest rates at the reporting date would not affect profit or loss.

A reasonably possible change of 100 basis points in interest rates at the reporting date would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant.

For the year ended 31 December 2019 (continued)

27 FINANCIAL RISK MANAGEMENT (continued)

	Profit o	or loss	Equ	iity
	100 bps	100 bps	100 bps	100 bps

	Profit o	or loss	Equ	iity
	100 bps	100 bps	100 bps	100 bps
31 December 2018				
Variable rate financial liabilities	(939,903)	939,903	(798,918)	798,918
Interest rate swaps	892,908	(892,908)	758,972	(758,972)
Net sensitivity	(46,995)	46,995	(39,946)	39,946

Foreign currency risk

Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the Company's functional currency. The Company is exposed to foreign exchange risk arising from currency exposures primarily with respect to the US Dollar. Most of the foreign currency transactions are in US Dollars or other currencies linked to the US Dollar. Since the Rial Omani is pegged to the US Dollar management believes that the foreign exchange rate fluctuations would not have significant impact on the pretax profit of the Company.

Credit risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables and finance lease receivable).

Trade receivables

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables is regularly monitored. Trade receivable balance represents receivables from OPWP, a Government customer in Oman.

This customer is transacting with the Company for number of years. Accordingly the balance due from this customer is assessed to have a strong high credit quality or limited credit risk. At 31 December 2019, the Company had one customer (31 December 2018: one customer).

The Company recognised an allowance for ECL in the financial statements. An impairment analysis is performed at each reporting date as per IFRS 9 expected credit loss method. The provision rates are based on days past due for the outstanding balance. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets and the amount is immaterial to the financial statements for the year ending 31 December 2019. The Company does not hold collateral as security. The Company evaluates the concentration of risk with respect to trade receivables as low, as its customer is located in Oman and it is a Government customer.

Finance lease receivable

Finance Lease receivable has been recorded in accordance with the terms of the PPA with OPWP, a Government customer in Oman and hence does not reflect any significant credit risk and the amount of ECL is not significant.

For the year ended 31 December 2019 (continued)

27 FINANCIAL RISK MANAGEMENT (continued)

Cash at bank

Credit risk on bank balances is limited as same are held with banks with sound credit ratings.

Credit Concentration

Except as disclosed, no significant concentrations of credit risk were identified by the management as at the statement of financial position date.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

Typically the Company ensures that it has sufficient cash on demand to meet expected operational expenses including the servicing of financial obligations. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. In addition the Company has access to credit facilities.

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted and include contractual interest payments:

	Carrying	Contractual	Less than 1	More than 1
	RO	RO	RO	RO
31 December 2019

	177,742,768	177,623,662	169,324,959	166,463,419

For the year ended 31 December 2019 (continued)

29 CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and benefit other stake holders. The management's policy is to maintain a strong capital base so as to maintain creditor and market confidence and to sustain future development of the business. Management is confident of maintaining the current level of profitability by enhancing top line growth and prudent cost management. The Company is not subject to externally imposed capital requirements.

The capital structure of the Company comprises of net debt (borrowings as detailed in notes 16 offset by cash and bank balances) and equity of the Company (comprising the share capital, reserves and retained earnings). The Company is not subject to externally imposed capital requirements other than the requirements of the Commercial Companies Law.

The Board regularly reviews the capital structure of the Company. As part of this review, the Board considers the cost of capital and the risks associated with each class of capital. The gearing ratio at 31 December 2019 of 335.01% (31 December 2018: 290.55%) (see below).

Gearing ratio

Gearing ratio at the end of the reporting year was as follows:	2019	2018
	RO	RO
Debt (i)	152,703,713	159,604,530
Cash and bank balances	(6,279,412)	(10,106,712)
Net debt	146,424,301	149,497,818
Equity (ii)	43,707,289	51,453,993
Net debt to equity ratio	335.01%	290.55%

- (i) Debt is defined as long- and short-term borrowings (excluding derivatives) as described in note 16.
- (ii) Equity includes all capital and reserves of the Company that are managed as capital.
